Dear Sirs,

**For Immediate Release
Bamboo Creek Plant Now Producing Gold and Cash Positive**

Today, Haoma advises shareholders that processing of low-grade Kitchener stockpiled ore* through the re-engineered Bamboo Creek Plant is now producing gold into cyanide solution which is being recovered onto carbon.

The first 1,500t ore parcel processed has so far generated 1,250 gm of gold onto carbon at 0.8g/t. This is significant as the average assay of the stockpiled low-grade Kitchener ore fed to the plant was 0.6g/t.

The Plant is currently processing ore at a rate of 1,000 tonnes per day and operating on a 24 hours per day basis. On this basis the Bamboo Creek operation is now cash positive.

Yours sincerely,

Gary C. Morgan
CHAIRMAN

*Note: Stockpiled ore includes 1 million tonnes with an average gold grade by traditional assay methods of less than 0.6g/t.
