Level 45, South Tower  
Rialto  
525 Collins Street  
**MELBOURNE VIC. 3000**

Dear Sirs,

**For Immediate Release  
Gold Produced at Bamboo Creek Plant**

Haoma is pleased to advise shareholders that during the week ended December 22, 2006 the re-engineered Bamboo Creek Plant produced 56.3oz (1.75 kg) of gold and 142.8oz (4.4kg) of silver from stripping 2.5 tonnes of carbon.

The Bamboo Creek CIP Circuit contains 8 tonnes of activated carbon (2 tonnes were stripped) and the Vat Circuit contains a further 6 tonnes of activated carbon (0.5 tonnes were stripped). At December 23, 2006 the estimated volume of gold on carbon was 295.8 oz (9.2 kg).

The Bamboo Creek Plant is currently operating 24 hours per day processing stockpiled Low Grade Kitchener ore\* at an average rate of 700 tonnes per day and recovering gold to carbon. At this rate of production the Bamboo Creek processing operation is cash positive.

Yours sincerely,

**Gary C. Morgan**  
CHAIRMAN

\*Note: There are 1 million tonnes of stockpiled Low Grade Kitchener ore with an average gold grade by traditional assay methods of less than 0.6g/t. Based on the Elazac Assay Method the gold grade of the stockpiled ore processed through the Bamboo Creek Plant over the last 7 weeks measured at least 1 g/t.
